December 10, 2018

To Whom it May Concern,

As I am currently a lite licensed user of the 3650-3700 MHz band and have significant investment in this band I feel it is necessary to inform you that an April 2020 deadline would create a financial burden on my company to replace all of the necessary equipment to be compliant. Also, the lack of certified equipment would create a further burden as we are having to wait for the manufacture of choice to be certified. With only one summer of operations to perform this overall it would prevent my company from making the necessary upgrades in others areas of our network to improve speeds and service to other areas that are in need. We are small company of just 10 employees and approximately 2200 customers.

Extending the transition period will help us and companies like us acquire the necessary equipment to prevent loss of service to our customers. Also, it will make it so we will be able to find the equipment as well as the availability of the equipment. We support the extension that has been requested in the Petition for Waiver submitted by WISPA and the UTC.

Thank you,

Rickie D. Hickox
President
